

P-C3062DN / P-C3562DN / P-C4072DN

Quality doesn't just come out of nowhere – it comes from us.

High performance capability with outstanding quality — that's what makes this A4 colour printer series stand out, first and foremost. However, at second glance, it's clear that it offers so much more. An intuitive user interface, high paper capacity, a wide range of media and first-class printing quality don't just guarantee an unparalleled reduction in workloads and ready-to-present print results, but also smiling faces. These colour systems meet virtually all of your requirements thanks to a multitude of additional features, such as printing from your smartphone or tablet. Why not give them a whirl?

What you can expect:

Quality and quantity: Due to remarkable printing speeds of 30, 35 or 40 A4 pages per minute, these colour systems offer high output in a short period of time, and therefore the ability to work faster. Thanks to a high printing quality of 1,200 x 1,200 dpi, you can benefit from excellent print results that will impress even the most quality-conscious boss. Texts and even fine lines are reproduced in high-definition.

Range of media: Versatility and flexibility are key qualities of these print systems. The optional expansion to the standard equipment, with a maximum of three additional paper cassettes, offers an input capacity of up to 2,100 sheets. This way, you can avail yourself of different media for different purposes at the same time. These professional printers effortlessly process print media in the formats A6R to A4, with paper weights of up to 220 g/m². And they don't shirk from labels, envelopes or coated paper, either.

Independence: In these times of increasing mobility, you need to be able to create documents from any end device, irrespective of location. To this end, the three print systems support printing via the free Mobile Print app or Google Cloud Print and, optionally, printing via WLAN and Apple AirPrint. A wireless connection can even be established between the printer and your Wi-Fi enabled end device via the optional function Wi-Fi Direct – all without a router.

Economy: It doesn't matter if your device is working under high pressure or on stand-by – this printer series is characterised by its particularly economic operation irrespective of operating mode, which is positively reflected in your cost balance. Thanks to their integrated energy-saving functions, these systems don't just print rapidly, but also in an energy-efficient and environmentally friendly way.
